

HEALING OF MAGIC

The Therapeutic Use of Magic in Physical Rehabilitation

Course Description

In today's environment, health care providers are often presented with developing treatment for diverse caseloads. Finding truly dynamic techniques that are effective, mobile, and effective for a wide variety of populations can be a time-consuming and frustrating task. Providers are not only seeking creative methods to meet their client's needs, they are also seeking modalities that are motivating and fun.

HEALING OF MAGIC is a carefully designed, systematic approach to the therapeutic use of simple magic tricks in physical and psychosocial rehabilitation. The learning and performing of magic tricks allows the client a means of safely exploring skill levels while providing a fun way of reaching therapeutic goals and achieving self-efficacy.

This workshop is designed to provide participants with the necessary knowledge to implement "magic therapy" into their practice as an effective treatment modality.

Course Objectives

After completing this workshop, the participant should be able to:

1. Demonstrate an understanding of using the movement required in learning magic tricks to aid clients in reaching therapeutic goals.
2. Distinguish which clients are appropriate for this type of treatment modality.
3. Evaluate and identify what goals/objectives can be achieved by using simple magic tricks in a therapy setting.
4. Create an individualized client-centered treatment program by analyzing and assessing the movements required to perform particular magic tricks.
5. Verify how to appropriately document this technique for insurance reimbursement.
